

# TRANSPORTATION IMPROVEMENT PROGRAM

## Fiscal Years 2017-2020

Approved by CUUATS Policy Committee  
June 22, 2016 (UPDATED JUNE 10, 2017)

PREPARED FOR:

Champaign-Urbana Urbanized Area  
Transportation Study,  
a program of the Champaign County  
Regional Planning Commission

IN COOPERATION WITH:

Illinois Department of Transportation (IDOT)  
Federal Highway Administration (FHWA)  
Federal Transit Administration (FTA)

PREPARED BY:

Ashlee McLaughlin  
Transportation Planner  
CUUATS/CCRPC  
1776 E. Washington St.  
Urbana, IL 61802  
Phone: (217) 819-4077  
Fax: (217) 328-2426  
Web: [www.ccrpc.org](http://www.ccrpc.org)

## POLICY COMMITTEE

Deb Frank Feinen, Chair .....City of Champaign  
 Robert McCleary, Vice Chair .....Village of Savoy  
 Laurel Prussing .....City of Urbana  
 Pius Weibel .....Champaign County Board  
 Bradley Diel .....CUMTD Board  
 Helen Coleman .....University of Illinois  
 Craig Emberton .....IDOT District 5

## TECHNICAL COMMITTEE

Levi Kopmann, Chair..... Village of Savoy  
 Jeff Blue, Vice Chair ..... County Highway Department  
 Richard Helton ..... Village of Savoy  
 John Cooper ..... County Highway Department  
 Karl Gnadt ..... CUMTD  
 Amy Snyder ..... CUMTD  
 William Gray ..... City of Urbana  
 Elizabeth Tyler ..... City of Urbana  
 Dave Clark ..... City of Champaign  
 Rob Kowalski ..... City of Champaign  
 Stacey DeLorenzo ..... University of Illinois  
 James Sims ..... University of Illinois  
 Robert Nelson ..... IDOT District 5  
 Brian Trygg ..... IDOT District 5  
 Elizabeth Murphy ..... Regional Planning Commission

## CUUATS Staff

Elizabeth Murphy ..... Acting Chief Executive Officer  
 Rita Morocoima-Black ..... Dir. of Planning & Community Development  
 Harshala Sardar ..... Transportation Engineer  
 Ashlee McLaughlin ..... Transportation Planner  
 Gabriel Lewis ..... Transportation Planner  
 Matt Yoder ..... Transportation Planner  
 Lori Morgan ..... Transportation Planner  
 Shuake Wuzhati ..... Transportation Planner  
 Zoe Keller ..... HSTP Coordinator/Mobility Coach  
 Debbie Peterik ..... Administrative Secretary

## INTRODUCTION

The Fiscal Year 2017-2020 Transportation Improvement Program (TIP) is a product of the on-going transportation planning process for the Champaign-Urbana Urbanized Area Transportation Study (CUUATS). It was prepared by CUUATS staff, under the direction of the CUUATS Technical Committee, for the CUUATS Policy Committee. The TIP is based on existing area-wide transportation plans, previous TIPs, Transportation System Management studies and the current construction plans of the implementing agencies.

The purpose of the TIP is to document proposed projects for a four-year fiscal period so that project funding can be secured. Any local project that solicits federal or state monies must be in the TIP in order to be considered for such funding.

Projects included in this TIP are proposed for implementation in one or more of the following jurisdictions: City of Champaign, City of Urbana, Village of Savoy, Village of Mahomet, Village of Tolono, University of Illinois, State of Illinois, Champaign County, Champaign County Forest Preserve District, or Champaign-Urbana Mass Transit District. Projects are subject to the financial availability of federal, state, and/or local agencies' funding sources. Approval by the CUUATS Policy Committee certifies that the requirements of 23 CFR, Section 450.308 are met.

The existing transportation system within the CUUATS planning boundaries is being adequately operated and maintained with the revenue sources that are provided through federal, state, and local jurisdictions. The FY 2017-2020 TIP is financially constrained, meaning that all funding estimates are based on anticipated state, federal, and local budget constraints.

## PROJECT CATEGORIES & PRIORITIZATION

The TIP is developed to meet federal regulations (23 CFR 450.324). In general, the TIP includes capital and non-capital surface transportation projects within the boundaries of the metropolitan planning area (MPA) to be funded with federal funds, as well as all regionally-significant projects requiring an action by FHWA or FTA regardless of the source of funding. As specified in those guidelines, those projects include transportation enhancements, Federal Lands Highway program projects, safety projects included in the State's Strategic Highway Safety Plan, trails projects, pedestrian walkways, and bicycle facilities. Projects from the following categories are included:

- Interstate - This category includes improvements to the Interstate Highway System, which are funded through Interstate 4R funds for reconstruction, rehabilitation, resurfacing, and restoration.
- Operating and Capital Assistance Projects - This category consists of transit projects funded through Sections 3, 5 and 9 of the Urban Mass Transportation Act of 1964. All transit projects in the Champaign-Urbana Urbanized Area are included in this category.
- Major or Area Service Highway Extensions - This category consists of those street projects within the urbanized area that are extensions of major rural roads in the urbanized area. Federal-aid Surface Transportation Program Rural (STP-R) funds are used for projects in this category.
- Urban Systems Projects - This category includes improvements to collector and arterial streets that are Federal-aid Highways. Federal Aid Surface Transportation Program (STP) funds are used for projects in this category.

IDOT and local projects that are not regionally significant in nature, such as small resurfacing projects or minor railroad crossing improvements, might not be individually identified in the TIP even though the projects receive federal funding. Smaller projects are often grouped together in similar categories (e.g. patching).

National goals and performance measures serve as part of the foundation of the Long Range Transportation Plan (LRTP): Sustainable Choices 2040, which was approved in December, 2014. The following national goals established by MAP-21 and the FAST Act (23 USC 150 (b)), are included in the TIP with ongoing implementation of the LRTP:

- Safety
- Infrastructure Condition
- Congestion Reduction
- System Reliability
- Freight Movement and Economic Vitality
- Environmental Sustainability
- Reduced Project Delivery Delays

The costs shown in this document are estimates of expected costs based on current information available about the projects. Costs shown for some projects are rough estimates, which will be refined after preliminary engineering work has been completed. Any significant changes to the cost of a project are reported to the CUUATS Technical and Policy Committees as TIP "amendments" or "administrative modifications" (explained in more detail below).

This document sets priorities in two ways. First, the report differentiates between projects to be constructed or to receive funding in the first fiscal year (FY 2017 Annual Element) and those to be constructed during the following three fiscal years (FY 2018-2020). The amount of time required for preliminary engineering and right-of-way acquisition, the availability of funds, and community needs will determine whether a project will be in the Annual Element or the latter portion.

Preliminary activities on some projects take place over multiple fiscal years before construction is able to begin. Unforeseen difficulties in these activities could delay a project for a year or more. Thus a project may be included in the Annual Element for more than one year.

The second prioritization method involves how STP-U [recently renamed Surface Transportation Block Grant Program (STBGP) in the FAST Act] funds are allocated within each of the four fiscal years in the TIP.

STP-U/STBGP project prioritization is determined by the Project Priority Review (PPR) Guidelines created by CUUATS and approved by both the CUUATS Technical and Policy Committees in 2008. Specifically, the PPR Guidelines require that, at a minimum, every project receiving STP-U/STBGP Local funding meets the following three requirements:

1. Consistency with the Long Range Transportation Plan, local plans, and federal transportation goals
2. Financial constraint
3. Project-specific eligibility and technical justification

Local agencies seeking STP-U/STBGP funding are required to submit an application to CUUATS for each project. Submitted projects are then allocated point values based on PPR assessment factors such as long term regional significance, mobility and safety, vehicular volumes, agency coordination, etc. Projects are then categorized into high, medium, and low priority levels. This method does not preclude the movement of a project into a higher priority level due to the immediate need for a project or moving a project forward or backward due to unforeseen funding issues. Projects are prioritized, at minimum, on an annual basis to reflect changing needs and circumstances.

Local Projects are identified by the CUUATS numbering system. This system lists the lead agency, the fiscal year the project was first listed in the TIP, and a second number corresponding to the order of the project in the lead agency's table (XX-YR-##). Starting this year, the project numbers will not change, even if the project moves to a different fiscal year at some point in the future, for the sake of consistency.

## **TIP ANNUAL ELEMENT**

In accordance with 23 CFR 450.220(c), the Metropolitan Planning section of the Federal Register, the participating members of the Champaign-Urbana Urbanized Area Transportation Study (CUUATS) agree that the State may propose federal-aid projects funded from the Highway Safety Improvement Program (HSIP). They also may propose projects funded with Interstate, NHS, STP-R, STP-U/STBGP, and BRRP monies, to be included in the statewide program of projects with these projects being drawn from the annual element of the TIP.

All federally funded projects that significantly alter the functional capacity or capability of a facility will be included in the TIP Annual Element.

All STP/STBGP projects, regardless of work type, will be included in the TIP Annual Element. Some projects of similar work types will continue to be combined in the TIP Annual Element as categories of improvements such as intermittent resurfacing and patching, etc.

The Illinois Department of Transportation will continue to provide CUUATS with the Department's entire annual and multi-year highway program regardless of funding source and work type.

The Illinois Department of Transportation will notify CUUATS of all projects proposed for State letting regardless of funding source and work type, including projects not shown in the TIP Annual Element.

The Champaign-Urbana area TIP will be utilized to develop the State's STIP. Highway and transit projects eligible for grouping will be summarized by year, fund source, and type of work. The STIP will be submitted for FHWA and FTA approval with appropriate documentation of public involvement.

## **TIP SELECTION PROCESS**

In accordance with federal regulations, the TIP is financially constrained. In other words, all projects in the first year element have verified funding sources and the projects in the second, third, and fourth year elements have reasonably guaranteed funding sources. Project implementation priority is given to the first year of the TIP. However, special circumstances may arise necessitating movement of a second, third, or fourth year project forward to the first year. When this occurs, such a move will take place with no further action required of the Technical or Policy Committees. The Technical and Policy Committees, however, should approve any project subject to amendment. MPO Staff, at the next regularly scheduled committee meetings, will advise the Technical and Policy Committees of any project advancements.

The Champaign-Urbana Urbanized Area Transportation Study receives an allocation of funds each year through formulas determined by the FHWA, FTA, and the Illinois Department of Transportation, administered by the Illinois Department of Transportation. The Surface Transportation Block Group Program (STP-U/STBGP) funds are the most significant funds for the Champaign-Urbana urbanized area. Agreement among all jurisdictions through the use of the current Project Priority Review (PPR) guidelines and subsequent approval by the Technical and Policy Committees determines the best use of these funds.

## **PUBLIC INVOLVEMENT PROCESS**

Since its inception in 1964, CUUATS has been actively committed to involving the public in its planning processes. Whenever a regular meeting, public hearing, or informational meeting is held, consideration is given to all comments or suggestions. In some instances, responses to resident input are prepared in writing and distributed to interested parties. For major transportation system developments, comments received by the public at a public hearing or by letter are responded to directly in the final report. Past examples of incorporating citizen comments into final reports include the Campus Area Transportation Study (CATS), the Greenways and Trails Plan, and the LRTP: Sustainable Choices 2040. Information about these projects can be found on the CUUATS website at [www.ccrpc.org/transportation/documents](http://www.ccrpc.org/transportation/documents).

CUUATS staff presently maintains an extensive mailing list, which includes active members of CUUATS committees and persons who have requested to be notified of meetings and events. The mailing list is informed about CUUATS public meetings via announcements that are sent out approximately (1) week before the scheduled event. Paid announcements for all CUUATS meetings are placed in the News-Gazette (the only daily circulation newspaper in Champaign-Urbana). Meeting announcements are also published on the CUUATS website.

The public is encouraged to participate at all CUUATS meetings. To facilitate public involvement in the development of a document or project, copies of all documents discussed at the CUUATS meetings are made available to the public on the Champaign County Regional Planning Commission website ([www.ccrpc.org](http://www.ccrpc.org)) prior to each meeting and are provided directly to individuals when requested. News releases are distributed periodically to announce the availability of a CUUATS report or to provide background on planning activities. Final copies of all CUUATS documents are made available to the public through the CCRPC and CUUATS websites and offices.

In addition to the aforementioned formal public involvement processes, CUUATS relies on informal techniques to get public input. CUUATS staff members often attend meetings of other governmental agencies where residents bring transportation-related issues and problems to

the attention of their elected officials. Informal public participation also occurs when an interested resident contacts the CUUATS office to discuss an issue or when an agency requests transportation or planning data.

In developing the TIP, staff complied with the guidelines set forth in the CUUATS Public Participation Plan, adopted in 2016. Public notice of transportation planning activities and time established for public review of the TIP satisfy the public participation requirements for FTA grantees and MPOs as outlined in 49 U.S.C 5307 (b)(1) through (7); The Metropolitan Transportation Planning and Programming requirements at 23 CFR part 450.314, 316, 322, and 324; and FTA Circular 9030.1E, "Urbanized Area Formula Program: Program Guidance and Application Instructions," Ch. V, Section 6.

## STP-U (LOCAL) ALLOCATIONS BY FISCAL YEAR

It is anticipated that funding will be available for all projects presented in the current TIP. The programming of STP-U/STBGP funds for local projects in the Champaign-Urbana Urbanized Area is a function of program development, project prioritization, and available financial resources. For FY 2017, the Illinois Department of Transportation has determined that the Champaign-Urbana Urbanized Area will receive \$1,497,672.36 and the Village of Mahomet Urban Area will receive \$81,439.27 (assuming full utility of the estimated apportionment), with the balance of the apportionment (determined by FHWA) being invested in the urbanized and urban areas by the IDOT District 5 office, in consultation and cooperation with the CUUATS Policy Committee and the Village of Mahomet. See STPU/STBGP tables for the Champaign-Urbana Urbanized Area and for the Mahomet Urban Area for more detail.

## HIGHWAY

The following table summarizes the programmed highway Federal funding for fiscal years 2017-2020 as represented in the TIP tables. The estimate of revenues for all projects is reasonable with respect to such funds anticipated to be available for the listed projects during the programmed TIP period as of the date this document was approved.

**Programmed Federal Funding FY 2017-2020**

Fund Category	FY 2017	FY 2018	FY 2019	FY 2020
NHPP-State	\$1,260,000.00	\$16,541,000	\$4,050,000	\$26,261,000
HSIP	\$814,000.00			
STP C-U	\$2,460,000		\$2,000,000	
STP Mahomet		\$160,000	\$260,000	\$96,000
STP-Urb 5-200K-S				\$426,000
STP-Rural-State	\$3,880,000.00		\$640,000	\$3,094,000
ITEP	\$2,340,420			
TIGER	\$15,705,327			
<b>Total</b>	<b>\$26,459,747</b>	<b>\$16,701,000</b>	<b>\$6,950,000</b>	<b>\$29,877,000</b>

## TRANSIT

The transit portion of the TIP is based on the Champaign-Urbana Mass Transit District's (C-U MTD) continuing efforts to provide modern, efficient, and effective transportation services and facilities. Services are designed to provide myriad public transportation options. The District's ongoing planning process evaluates and updates both short and long-range mobility needs, and then develops and implements effective solutions. The District has implemented and refined several development proposals to serve the community including a one-half fare cab program, a no-cost fixed route bus service for disabled persons and senior citizens, and 100% fixed route accessibility for wheelchairs.

Forecasts for Section 5307 Funds have been incorporated in the development of the TIP. These forecasts are based on previous funding levels received by C-U MTD. The forecasts are utilized as a good faith effort to keep the TIP fiscally constrained. Like all projects included in the TIP, all transit projects in the TIP are available for public review and comment as outlined in the CUUATS Public Participation Plan.

## BICYCLES & PEDESTRIANS

The LRTP: Sustainable Choices 2040 includes several goals related to providing travel options for pedestrians and bicyclists. The intent is that all transportation system users in the urbanized area will have access to a network of transportation modes and "complete street" infrastructure that:

- Maximizes connectivity between origins and destinations and the modes used to travel between them;
- Improves mobility during peak traffic hours;
- Improves safety and convenience; and
- Considers all users.

Bicycle and pedestrian projects do not have an annual funding allocation at this time. These projects tend to be either part of a larger roadway or construction project, and/or have received grant funding for their construction.

## AIR QUALITY CONSIDERATIONS

According to the IEPA's 2013 Annual Air Quality Report, Champaign County continues to be an attainment area, which means that air quality is within acceptable parameters for common air pollutants.

Transportation officials in the Champaign-Urbana area recognize that a relationship between transportation and air quality exists. Air quality is one of many determinants in selecting highway or transit projects for implementation, receiving consideration during project planning and implementation procedures. It should be noted that most highway and transit projects considered in the Champaign-Urbana area are designed to improve the area's overall air quality.

## TIP ADMINISTRATIVE MODIFICATION & AMENDMENT PROCEDURES

The development and subsequent approval of the four-year Transportation Improvement Program (TIP) does not mark the end of the MPO's annual obligation. The TIP requires routine maintenance as the listed projects evolve throughout the fiscal year. The programming of transportation improvements within the urbanized area produces a tension between the need for a fast delivery of project contracts and the more time-consuming need for agency fiscal constraint and a transparent public input process. The effective management of the TIP amendment process helps to balance the need for quick turn-around to keep projects on schedule, while still providing fiscal constraint and a transparent public input process. The purpose of this section is to outline the procedures CUUATS staff and member agencies use in revising the CUUATS TIP.

The procedures described in this document for amending the multi-year TIP have been agreed upon by CUUATS member agencies, and are consistent with federal transportation planning regulation and legislation. The procedures are meant to accommodate complex project changes and additions, as well as permitting a simplified procedure for smaller administrative changes.

## Background

Titles 23 and 49 of the United States Code require that every MPO produce a multi-year TIP that includes all projects which seek federal funding and other regionally significant transportation projects. The Champaign-Urbana area TIP is updated annually and covers a four-year period. The Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) will only approve projects and grants for projects that are programmed into the current approved TIP.

During a given fiscal year, CUUATS staff can be asked to amend the current TIP document if a member agency needs to proceed with a project that is not programmed into that fiscal year. These revisions must maintain year-to-year fiscal constraint for the four years of the TIP. The amended project must also be in conformity with the approved urbanized area Long Range Transportation Plan.

Federal Transportation Planning Regulations in Title 23 provide the MPO with the discretion to create and approve alternative procedures to more effectively manage actions in the TIP that may occur during a given fiscal year. The regulations require the approval of any alternative procedures developed by the MPO, and documentation of the procedures in the TIP document. The following section lists the procedures used by the Champaign-Urbana area MPO when revising the TIP through the use of Amendments and Administrative Modifications, in accordance with federal regulations. The policies and procedures for Amendments and Administrative Modifications are outlined below.

### Administrative Modification

An Administrative Modification is a revision to the TIP that includes minor changes to project/projects phase costs, minor changes to funding sources of previously included projects, minor changes to a project description, and the movement of an included project among fiscal years. An Administrative Modification is a revision that does not require public input, re-demonstration of fiscal constraint, or a formal approval by the CUUATS Technical and Policy Committees. The following thresholds were established to determine whether an Administrative Modification is possible for a submitted TIP revision:

1. Modification of a TIP project description, as long as the modification does not significantly change the project's intended function, nature, costs or environmental impact.
2. TIP Project Year of Expenditure federal aid cost changes that do not cause a change in funds allocated by the federal agency(ies) exceeding the following thresholds for the Total TIP Project Cost (which may not be the same as the total project cost):

**Cost Change Thresholds**

Total TIP Project Cost	Percent Change in Total TIP Project Cost
\$0 - \$249,999	25%
\$250,000 - \$999,999	20%
\$1,000,000 - \$2,999,999	15%
\$3,000,000+	10% (capped at \$5 million)

3. Increases or decreases in federal or state funding, or increases or decreases in local matches as long as the total cost meets the cost change thresholds.
4. Changes in federal project funding sources that do not alter the federal project cost, and the project meets the funding category's eligibility requirements.
5. Changes in state and local funding sources that do not alter the fiscal constraint of the project and meet the cost change thresholds.
6. Moving a project/projects phase from future years of the TIP to the current fiscal year, or vice versa, as long as the project/projects phase was in the originally approved TIP or was included through the TIP amendment process.
7. A split or combination of individually listed projects; as long as cost, schedule, and scope remain unchanged. The addition or deletion of project phases from a TIP Project as long as the funding amounts for the new line items stay within the cost change thresholds and the new line item does not result in a significant change to the original intent of the TIP Project. If an approved TIP Project is listed without a right-of-way phase (ROW), and an incidental ROW need is discovered during the design phase, a

ROW purchase can be authorized under either the design or construction phase without amending the TIP. "Incidental" ROW is the purchase of a minor parcel(s) (including utility relocation) that does not involve the taking of any environmentally sensitive land or residential/commercial structure.

8. Changes to the lead agency identified for a TIP Project or TIP Project Phase.
9. Additions, deletions, or corrections to projects listed in the Illustrative Table.
10. Data entry or typographical errors.

Any agency requesting an Administrative Modification to a TIP Project or project phase must submit a detailed description of the proposed changes to CUUATS staff including:

- A project/projects phase description
- Cost changes, including cost by agency if more than one agency is involved
- Fund type

Each MPO-approved Administrative Modification will be published online separately from TIP Amendments. The MPO staff will summarize this information at the next CUUATS Technical and Policy meeting following the Administrative Modification to the TIP.

Amendment

A TIP Amendment refers to any major change to a project in the TIP including: the addition or deletion of a project, a major change in project cost, or a major change in design concept or project scope (e.g., changing project termini). The movement of a project from the Illustrative Table to a fiscal year in the TIP will require a TIP Amendment; however, changes to projects in the Illustrative Table will remain an Administrative Modification. A TIP Amendment requires a public meeting to redemonstrate fiscal constraint and provide the public with the opportunity to provide input. The following changes will be considered grounds for a TIP Amendment:

1. Addition or deletion of a project (regardless of cost, except for project phases that are in accordance with the Administrative Modification thresholds).
2. Addition or deletion of a new project phase that is beyond the thresholds set for Administrative Modification.
3. Major changes to the project scope.
4. Major changes to the amount of federal aid funding for project costs exceeding the thresholds set for Administrative Modification.
5. Addition of a ROW phase that includes the taking of environmentally sensitive lands or residential/commercial structures.

Any agency requesting a TIP Amendment must submit a detailed description of the proposed changes to CUUATS staff including:

- A full project/projects phase description including termini or project location
- Cost changes, including costs by agency if more than one is involved
- Fund type
- Lead agency and any other agencies involved

TIP Amendments are subject to the approval of the CUUATS Technical and Policy Committees. During these two meetings, the public will have the opportunity to comment on the proposed amendment(s). Once approved, the amendments will be forwarded to IDOT in accordance with the MPO's established procedures. As with Administrative Modifications, any TIP Amendment will be posted online under a separate heading for amendments.

## **Special Case TIP Alterations and Circumstances**

### Emergency Actions

In accordance with federal rules and regulations, in the event that the State of Illinois or the federal government declares a state of emergency, CUUATS may process any TIP Amendment or Administrative Modification that is related to mitigation of the emergency as an Administrative Modification. If applicable, the TIP changes would be processed in accordance with the TIP Amendment procedures during the next CUUATS Technical and Policy Committee meetings.

### Time-Sensitive Actions

In the event that any member agency needs to amend or modify the TIP between regularly scheduled meetings to accommodate a grant deadline, bidding process, or other time-sensitive situation, CUUATS may process any TIP Amendment or Administrative Modification that is related to the deadline as an Administrative Modification. If applicable, the TIP changes would be processed in accordance with the TIP Amendment procedures during the next CUUATS Technical and Policy Committee meetings.

### Dispute Resolution

If a question arises on the interpretation of the definition of an Administrative Modification or a TIP Amendment, the MPO, IDOT, FHWA, and FTA (the parties) will consult with each other to resolve the question. If after consultation, the parties disagree on the definition of what constitutes an Administrative Modification or a TIP Amendment, the final decision rests with FHWA for roadway projects and with FTA for transit projects.

### TIP Revision Procedures

This document is an agreement between CUUATS member agencies documenting how these planning partners will address TIP revisions. The procedures conform to State and Federal policies and regulations governing the development and modification of the TIP.

## FEDERALLY OBLIGATED PROJECTS

Federal regulation requires that the TIP provide reference to projects from the previous fiscal year that have federal funding obligated to them. The following information summarizes those projects from April 1, 2015 through March 31, 2016 that have obligated federal funding.

State Project ID	TIP Project ID	Description	Total Project Cost	Federal Cost Share	State Cost Share	Other Cost Share
C-95-035-15	2015 SWHSIP-2	8", Bicycle Friendly, Milled Rumble Strips (one location of various district wide)	\$523,951	\$471,555	\$52,396

CH-18-09, UR-18-05, MTD-18-02, UI-18-02	2019	MCORE Project 5: Green Street	Busey Avenue	Race Street	CH	CH, UI, UR, MTD	CIF, MFT, SWUF				\$2,994,615	\$2,994,615	ADA accessible ramps and sidewalk improvements, bus stop improvements, bicycle facilities, improved roadway surfaces, curb and gutter repair and replacement. Urbana \$1,050,000; MTD \$776,840
SA-19-01, CH-19-05	2019	Prospect Avenue	Curtis Road	Windsor Rd	SA	SA, CH, Federal	MFT, STU, CIF	\$2,000,000		\$1,193,000	\$607,850	\$3,800,850	Complete Street Engineering and Reconstruction, SN 09-00015-00-PV

ILLUSTRATIVE PROJECTS

Illustrative projects are those projects that local agencies would like to see implemented, but do not yet have funding sources. The projects in this table are grouped by agency, but are not listed in any particular order of priority.

Lead Agency	Project Location	Project Description	Construction Cost Estimate	ROW Cost Estimate	Engineering Design Cost Estimate	Utility Cost Estimate	Total Project Cost Estimate	Notes
City of Urbana	I-74 Interchange	Construction, design engineering, ROW for interchange	TBD	TBD	TBD	TBD	TBD	Location Undetermined
	Florida Avenue from Abercorn Street to High Cross Road	Street construction: bike path, intersection work, signals	TBD	TBD	TBD	TBD	\$4,000,000	Partial Developer Funded
	Washington Street from Pfeffer Road to Scottswood Drive	Street reconstruction	TBD	TBD	TBD	TBD	\$1,800,000	Reconstruct as Urban Cross Section
	Florida Avenue from Lincoln Avenue to Vine Street	Street reconstruction	TBD	TBD	TBD	TBD	TBD	
	Broadway Avenue: Park Street-Country Club Road; Park Street: McCullough Street-Broadway Avenue	Multi-use Pathway	TBD	TBD	TBD	TBD	\$600,000	
	Florida Avenue from Lincoln Avenue to Race Street	Multi-use Pathway	TBD	TBD	TBD	TBD	\$350,000	
	Olympian Drive between Lincoln Avenue and US 45	Location study update, design engineering, ROW, construction	TBD	TBD	TBD	TBD	TBD	
	Florida Avenue from Busey Avenue to Vine Street	Street Resurfacing/Reconstruction	TBD	TBD	TBD	TBD	TBD	
Village of Savoy	West Church Street from Dunlap Avenue to Mattis Avenue	Road widening and pavement	TBD	TBD	TBD	TBD	\$3,000,000	
	Mattis Avenue from Church Street to Corp. Limits	Road widening and pavement	TBD	TBD	TBD	TBD	\$2,500,000	
	First Street from Church Street to Airport Road	Roadway improvement	TBD	TBD	TBD	TBD	\$3,000,000	
	Curtis Road from Wesley Avenue to First Street	Construction, design engineering, railroad grade separation	TBD	TBD	TBD	TBD	TBD	
	Colbert Park to Prospect Avenue through Prairie Fields Subdivision	Design and Construction of 10' Wide Multi-Use Path	\$1,500,000	TBD	TBD	TBD	TBD	
University of Illinois	St. Mary's Rd - Fourth St to Neil St	Complete Street: pavement rehab, bike lanes, sidewalks	\$1,800,000	TBD	\$200,000	\$100,000	\$2,100,000	
	Peabody Dr - Fourth St to Wright St	Sidewalk and bike path improvements	\$850,000	TBD	\$100,000	\$50,000	\$1,000,000	
	Sixth St - Gregory Dr to Pennsylvania Ave	Complete Street	\$160,000	TBD	\$40,000	\$10,000	\$210,000	
	Oak St - Kirby Ave to Hazelwood Dr	Complete street and sidewalk work	\$250,000	TBD	\$35,000	TBD	\$285,000	
	Goodwin Ave North of Hazelwood Dr	Modified subgrade and resurfacing with limited curb work	\$200,000	TBD	\$50,000	TBD	\$250,000	
	Pennsylvania Ave - Wright St to Goodwin Ave	Reconstruction: bike lane, sidewalk, ramp improvements	\$2,200,000	TBD	\$400,000	TBD	\$2,600,000	
	Kirby Ave at Oak St	Traffic signal controller upgrades	\$100,000	TBD	\$10,000	TBD	\$110,000	
	Gregory St - Nevada St to Oregon St	Reconstruction	\$150,000	TBD	\$25,000	TBD	\$175,000	
	Goodwin Ave - Pennsylvania Ave to Peabody Dr	Reconstruction	\$120,000	TBD	\$20,000	TBD	\$140,000	
Champaign County Forest Preserve District	Main St (St Joe) to Vermilion County line	Kickapoo Trail - Stage II, Design Engineering	TBD	TBD	\$210,000	TBD	\$210,000	
	Main St (St Joe) to Vermilion County line	Kickapoo Trail - Stage II, Construction Engineering	TBD	TBD	\$231,000	TBD	\$231,000	
	Main St (St Joe) to Vermilion County line	Kickapoo Trail - Stage II, Construction	\$2,100,000	TBD	TBD	TBD	\$2,100,000
